BRB Proposal for SAAB Members

BRB Publications would like to propose a unique, win-win, no cost service to interested members of SAAB.

Specifically, BRB is willing to provide each participating state PI association a links list of government agencies who offer free online access to public records for the particular state.

The data would be provided in an Excel file. The links could then be displayed on that state association's web page of choice. The links can be used as a resource on a Member's Only page, or on a page open to the public. Either way is fine with us.

To insure the data is current, we would like to send monthly updates – or update the links more frequently if there are significant changes.

To give you an idea of the links involved, go to our page at <http://www.brbpub.com/freeresources/pubrecsitesState.aspx>. From there click on the state of interest to view that state's links. The links appearing on the page are what we would like to provide.

There is no fee. We merely ask for recognition on the page. We would like to see text similar to "...These sites are provided by BRB Publications. For a list of links for all states, please visit www.xxx.xxx..."

Of course, I realize this idea must first be approved by each individual state PI association. Please know if anyone has questions or concerns, I would be most happy to talk to them.

I believe this is a nice win-win situation. Thank you for the consideration.
